

EOS:

Here is the immediate network around EOS Owner (the holding wallet) and how ETH made its way to exchanges. The coloring is as follows:

- Red nodes are recipients of ETH from EOS-Owner
- Blue nodes are recipients of ETH from red nodes
- Green nodes are recipients of ETH from blue nodes.
- The darker the color of the line and arrow, the more ETH was transferred.

This is a small snapshot of the whole data set for further analysis
